ARE YOUR FUEL DEVICES CORRECTLY REGISTERED?

The Texas Department of Licensing and Regulation (TDLR) classifies devices that deliver fuel through a single nozzle at a rate of less than 20 gallons per minute (GPM) in two categories:

- Single product device; and
- Multi-product device.

To aid you in this classification process, listed below are common examples of fuel devices, including fee calculations.

Each nozzle represents a single device and most device cabinets have two sides, with nozzles on each side. Please remember to count and include all devices on your registration application.

If you have any questions or need additional information, feel free to contact us on our toll-free number: 1-800-803-9202.

3 – Single Product Devices ^a
Fee: \$31 / nozzle

Total Fee / Cabinet: \$186
(as illustrated above)
2 sides x \$93 (\$31/device) = \$186

Single Product Device ^a
Fee: \$31 / nozzle

AND

Multi-Product Device ^b
Fee: \$93 / nozzle

Total Fee / Cabinet: \$248
(as illustrated above):
2 sides x (\$31/device + \$93/device) = \$248

Multi-Product Device ^b
Fee: \$93 / nozzle

Total Fee / Cabinet: \$186
(as illustrated above):
2 sides x \$93/device = \$186

Notes:

- Single product device (includes a fuel quality fee of \$7) – \$31. A single product device delivers one gasoline, E85 ethanol fuel, diesel, or other non-gasoline product from a single nozzle.
- Multi-product device (includes a fuel quality fee of \$21) – \$93. A multi-product device delivers 2 or more blends of gasoline or ethanol-blended fuel from a single nozzle.
- These illustrations represent examples of device cabinets commonly found in the marketplace. TDLR does not endorse or recommend any brand of device cabinet.
